## **How to make a campfire**

You can build a campfire in many ways.

First, we build a tepee or cone fire.

Then we build a log cabin fire.

Light the fire from underneath. As tinder use bark or fire lighters.

Respect the fire and use fireproof clothing. Keep the fire blanket and a bucket of water near the fire.

Before you leave the lean-to, clean up after yourself and make sure the fire is out.

## How to make Finnish campfire coffee

Start making Finnish campfire coffee by adding water in the coffee kettle and placing the kettle above the campfire.

Bring the water to a boil and remove the kettle from the heat

Add 4 deciliters coffee grounds in two liters water.

Stir the coffee grounds into the water and place the kettle over the campfire until the coffee boils.

Remove the kettle from the heat and mix the coffee by pouring it into a mug and then back into the kettle again.

Finally, let the coffee sit for a while before you serve it.

Here is a brief recap:

1. Boil the water in the kettle.
2. Add the coffee grounds in the kettle and bring the coffee to a boil.  
Add 4 dl coffee grounds in 2 l water.
3. Mix the coffee by pouring it into a mug and then back into the kettle again.
4. Let the coffee sit for a while before you serve it.
